

Is Your Basement Safe?

Certain conditions can cause mold growth to occur in as little as 2 days

PREVENT HARMFUL MOLD GROWTH

Protect your family and home from dangerous basement mold growth. Waterproof your basement and install an Aprilaire dehumidifier for long-term protection.

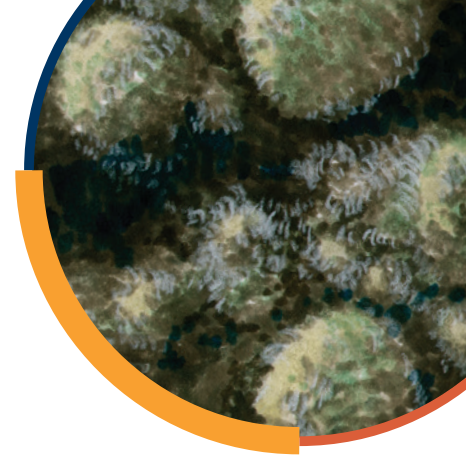

MODELS AVAILABLE

Designed and built in the USA

Prevent harmful mold in your basement—before it's too late.

Don't ignore your basement.

The fight against mold and bacteria begins in your basement with a high-capacity dehumidifier from Aprilaire.

UNPROTECTED BASEMENT MOISTURE

Outside relative humidity (RH) can drastically affect your home and promote mold growth. Typical summer conditions can create humidity levels in the basement that routinely exceed 85%—leading to mold growth in as little as two days.

COMPLETE SOLUTION

A dehumidifier in an waterproofed basement provides a complete moisture-control solution for your home. A high-capacity dehumidifier from Aprilaire will protect you and your family from harmful mold and bacteria even in the warmest summer months.

BASEMENT MOLD GROWTH*			
Crawlspace Temp (°F)	Relative Humidity	Dew Point (°F)	Days Til Mold Growth
68°	50%	48°	-
68°	60%	54°	-
68°	65%	56°	-
68°	70%	58°	165
68°	75%	60°	38
68°	80%	62°	14
68°	85%	63°	6
68°	90%	65°	4
68°	95%	67°	3
68°	100%	68°	2
